TOTAL		0	0	9,022	78	9,100

11. Verification of Receivership & Readership

Controlled Home Delivery and Mail Distribution

The Circulation Verification Council interviewed 513 residents in the primary market areas indicated in paragraph nine. The purpose was to identify the number of residents who indicate they receive the publication on a regular basis, and further identify the number of residents who read or look through the publication. The interviews took place throughout the audit period between the hours of 5:30 PM-8:30 PM and 10:00 AM-2:00 PM. All respondents identified themselves as 18 or older. The following questions were asked:

1. Central Valley Shopper is distributed Weekly in your area. Do you receive the Central Valley Shopper on a regular basis?
 2. (If response to #1 was YES) Do you or someone in your household regularly read or look through the Central Valley Shopper?
- CVC interviews indicate that 502 of 513 households or 97.9% indicated they receive the Central Valley Shopper on a regular basis.
 - CVC interviews indicate that 259 of 502 or 51.6% indicate they regularly read or look through the Central Valley Shopper.

*Households reporting stop delivery requests were excluded from the survey.

The Circulation Verification Council estimates that all the information in this text box has a minimum accuracy level of +/-2.5%.

12. Verification of Distribution

Controlled Bulk Distribution

- **Central Valley Shopper did not report significant controlled bulk/single copy distribution during the audit cycle.**

13. Council Audit Statement

We have reviewed the printing, distribution, circulation, and general ledger records of this publication for the purpose of compiling this information. Our review was completed using Council auditing procedures and surveys considered necessary under the circumstances of the audit. In our opinion, this report fairly and accurately represents the publication's printing, distribution and/or circulation for the period (s) indicated.

The current status of this report expires March 31, 2008.

Central Valley Shopper – Toppenish, WA – 01-2304 Supplemental Readership Study

The Circulation Verification Council interviewed 513 residents in the primary market areas indicated in publication's CVC audit report. The purpose was to identify the number of residents who indicate they receive the publication on a regular basis, identify the number of residents who read or look through the publication, and gather readership study information useful for advertising purchase decisions. Market statistics estimates appearing in CVC reports are obtained from EASI Software 2007. The population studied consisted of adults age 18 and over, living in households within the survey area. Within this area, each household and each adult within the household had a known (or "non-zero") probability of being selected for the sample. Interviews were conducted solely with pre-designated respondents and no substitutions were permitted. The verification and readership study took place throughout the audit cycle between the hours of 5:30 PM and 8:30 PM and 10:00 AM and 2:00 PM. Initial interview attempts were spread evenly across all survey days (i.e., Tuesday through Saturday). A minimum of 250 completed interviews is required with no more than one interview per household. Interview Procedures: To ensure the highest degree of comparability and to facilitate the auditing process, a standard, consistent, specified list of interview questions was asked. Interviews were conducted by CVC with supervision, interview training, and monitoring capabilities. Interviews were conducted over a minimum period of four weeks to minimize the impact of weather and/or special events. Every effort was made to ensure that interviews were assigned randomly by day and that an approximately equal number of interviews were completed on each interviewing day. Where appropriate, data was balanced and/or weighted by ZIP code using up-to-date known demographics: gender, age, number of adults in household and ethnicity in those cases where one minority comprised no less than ten percent of the total population. Non-responses to any single question were eliminated from the survey. In all cases, at least six attempts were made to contact all pre-designated respondents. The telephone rang a minimum of six times each time a number was dialed before the attempt was classified as a "no answer." Each number was dialed at different times and, as necessary, on different days. Every effort was made to surmount language, cultural, behavioral and other barriers to a successful interview; and to the extent feasible, callbacks were scheduled on a random basis. At least one callback attempt per respondent was made on a weekend. During the interview process, no questions were asked prior to the publication readership question, with the exception of a qualifying question designed to determine the ZIP code of recipient residence; and general warm-up questions designed to put the respondent at ease. Warm-up questions did not include any reference to the publication itself or the nature of the study. This study followed recommended guidelines developed in part from the Advertising Research Foundation (ARF) readership guidelines. Survey totals may not equal 100% due to rounding. The Circulation Verification Council estimates that all the information in this survey has a maximum error margin of +/-2.5 (95% confidence level).

- **Average readers per edition during the audit period: 1.425***

*Readership estimates compiled from 2006 CVC circulation & readership study data.

1. The Central Valley Shopper is distributed every week in your area. Does your household regularly receive Central Valley Shopper?
